Personal Profile

Isaac is a hardworking problem solver who loves a challenge and overcoming a challenge even more. With a mathematical background and a strong pool of technical tools at his disposal, Isaacs skills are perfect for utilising data and analytics to provide value to a business.

Isaac is enthusiastic about coding and creativity, so he is always seeking opportunities to combine the two and utilise exciting cutting-edge data science techniques to create a product which can give back to the community.

Career Summary

Zurich UK, Junior Data Scientist

September 2019 - Present

- + Develop and maintain applications from prototype through to production using methods such as Azure Function Apps.
- + Use deep learning model frameworks such as XGBoost and Neural Networks in Python and R to perform predictive analytics.
- + Communicate complex concepts to stakeholders with minimal technical backgrounds, utilising visualisation packages such as Matplotlib or ggplot2.
- + Clean, format, and engineer variables from various forms of data.
- + Innovate new methods and ideas to make data science processes more effective and efficient.
- + Ensure ethical use of data and guarantee analysis is not biased.
- + Thoroughly document work and be prepared to explain it to colleagues.

Waitrose, Shopfloor Assistant (Part-time)

September 2015 - January 2019

- + Ensuring stock is readily available on shelves.
- + Helping solve customer enquiries.
- + Fixing daily problems found within the store.
- + Assisting training new staff.
